PRICE LIST · NOVEMBER 2026

SparkTest on premise: sizes, pricing and terms.

SparkTest is licensed per maintained test. One package on a dedicated SparkNode in your network, in three sizes. Runs, repairs and console users are not counted.

> **Prices are for the subscription only, in euros, VAT excluded. Hardware, installation and configuration are excluded and quoted separately.**

01 ON PREMISE THREE SIZES · THREE SUBSCRIPTIONS

Same quality, three capacities.

SIZE	S	M	L
For	A team, one or two applications	A department, several applications	An application portfolio or a programme
A month	€590	€1,690	€3,900
A year, annual contract	**€7,080**	**€20,280**	**€46,800**
Maintained tests	**100**	**400**	**1,500**
Price per test, a month	€5.90	€4.23	€2.60
Applications	**2**	**10**	**No limit**
Parallel runs	**2**	**4**	**8**
Full suite, estimate	17 to 50 min	33 to 100 min	1 to 3 hours
50 more tests, a month	€350	€250	€150
A test beyond the included ones	€7 a month	€5 a month	€3 a month
Machine, indicative	32 GB memory	64 GB memory	128 GB memory
Hardware, installation and set-up	Quoted separately	Quoted separately	Quoted separately

The price per test falls with the size, from €5.90 to €2.60 a month. A test beyond the included ones always costs more than a test in the next size up: beyond 3 packs on S, or 8 on M, the next size costs less. Suite times assume tests of 20 to 60 seconds. The model is the same on every size, and so is the quality of codifying and repairing.

02 THE MAINTAINED TEST THE UNIT OF THE LICENCE

You pay for coverage, not for runs.

What it is	A test case that SparkTest keeps running and repairing: up to 25 steps and 5 minutes of running time. A longer journey is split into two or more test cases. A test case in quarantine does not count, and the console shows how many you have against what your size includes.
Runs are not counted	A run is code: the local AI works when a test is written or repaired, not at every run. So run the whole suite at every release and every night: a regression check is worth more the more often it runs.
Repairs are not counted	Keeping the tests working is what the fee pays for: you never pay for a repair, and every repair is shown for review.
Growing	Add packs of 50 tests, or move to the next size. Each size also includes a number of applications.

03 LICENCE AND TERMS WHAT THE SUBSCRIPTION COVERS

One licence file, clear terms.

The licence	A signed file installed on the SparkNode, in your company's name. It sets size, maintained tests (packs included), applications, parallel runs and expiry, and it is verified on the machine without a network connection. Its limits apply when a test case or an application is created.
Contract	Annual contract, with the fee quoted a month: €7,080 a year for S, €20,280 a year for M and €46,800 a year for L.
Included	The licence, the updates to the codifying engine, to the maintained actions and to the model, and support. Runs, repairs and console users are not counted.
Not included	Hardware, installation and configuration, quoted separately. Prices exclude VAT.
The machine	A configuration we specify for each size, which you buy to our specification or we supply already installed. Local inference needs memory and an accelerator: a standard virtual server is not enough. The memory figures are indicative.
What can be tested	Applications you own or are authorised to test, through a browser. SparkTest is not for scraping, monitoring third-party sites or load testing.
Your tests	Every test is a readable script, versioned with the test case: the plan of steps and the runtime that executes it. From the console it downloads as one file with a small runner, and it runs with Node and Puppeteer, without SparkTest.

The same product, on our nodes.

When the application is reachable from the internet, SparkTest can run on SparkTech's own nodes instead of a machine of yours. Same unit, same rule: a test beyond the plan costs more than moving up. Two months free on annual billing.

PLAN	Starter	Growth	Scale
For	A smoke suite for one product.	Regression on every merge.	Testing as infrastructure.
A month	€149	€490	€1,490
Maintained tests	**25**	**100**	**400**
Projects	**1**	**5**	**Unlimited**
A test beyond the plan	€6 a month	€5 a month	€3.50 a month
Included	• Daily schedule and on demand • 1,500 runs a month • Repairs included • Email support	• On merge, only the areas you name • 25,000 runs a month • Repair review • Notifications on Teams and Slack	• Unlimited runs, fair use • API insights per release • Signed webhook to your tools • 99.5% run SLA

THE FIRST STEP

Start with one application.

A pilot on one application, with the size that fits it. We install the machine, connect your environments and codify the first tests with your team.
